

Indiana's Journey Beyond Coal

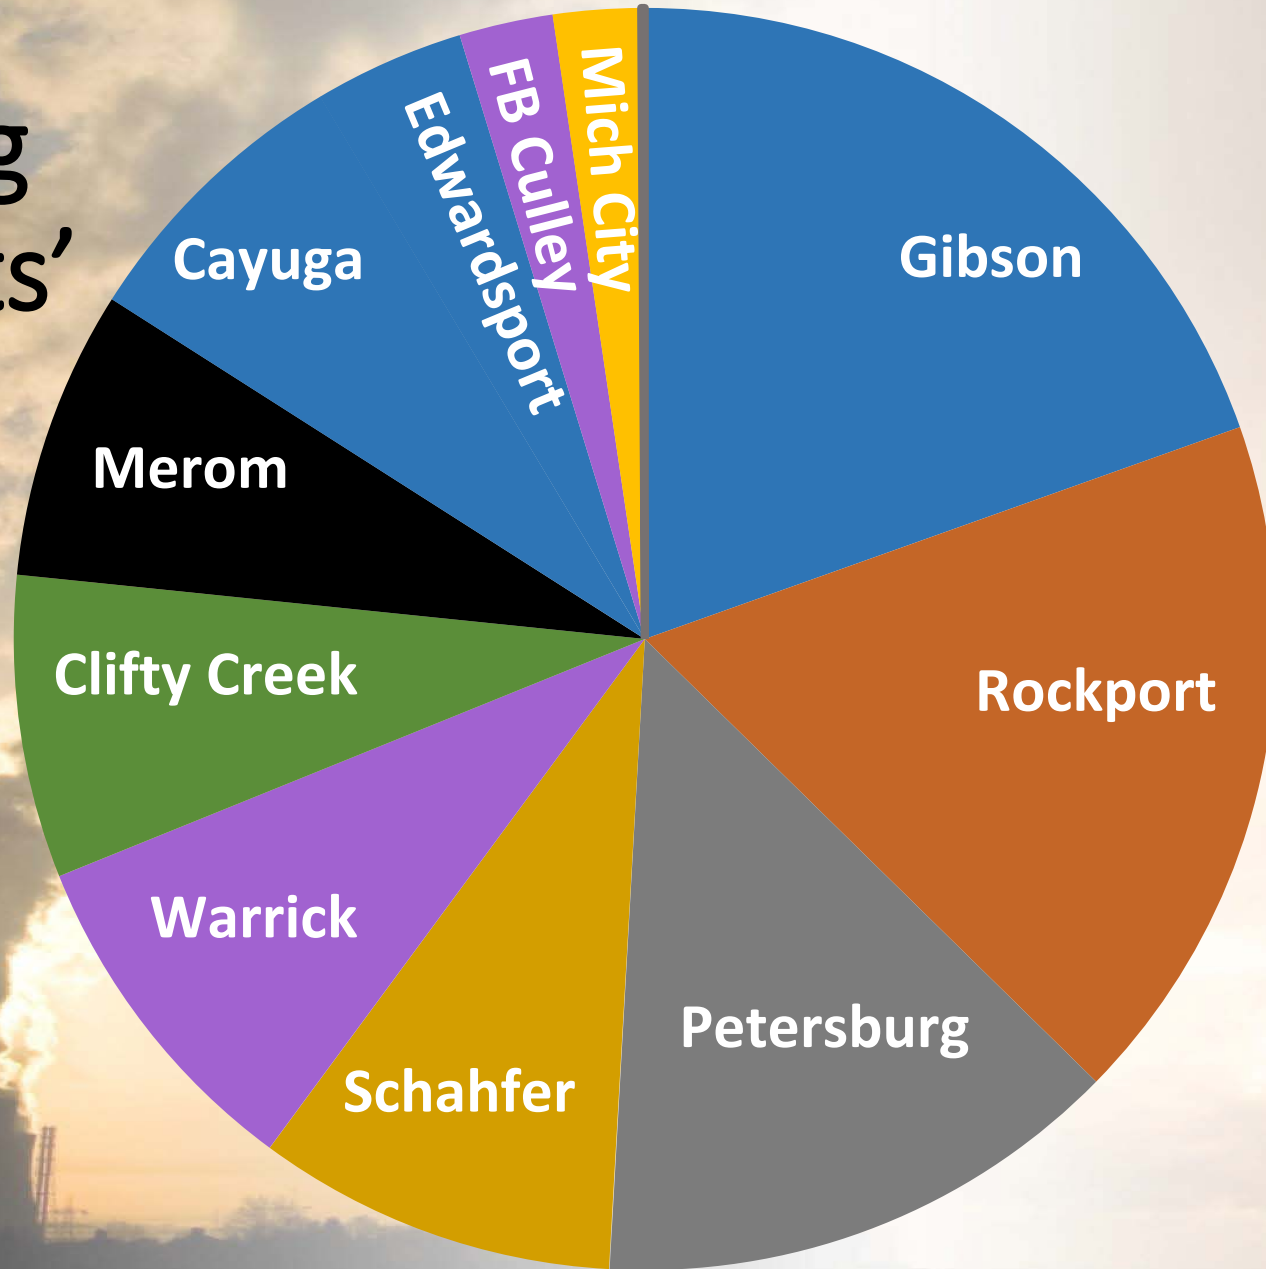

Remarks by Jodi Perras, Acting Deputy Regional Director,
Beyond Coal Campaign
Richard G. Lugar Center for Renewable Energy Spring Forum
May 14, 2018

Top Ten States in Coal Retirements/Proposed Retirements (MW)

- Indiana is 2nd in the nation with 7,595 MW of coal capacity proposed to retire or already retired
- 2,431 MW to retire between now and 2030
- AEP-Rockport would be 2,600 MW more

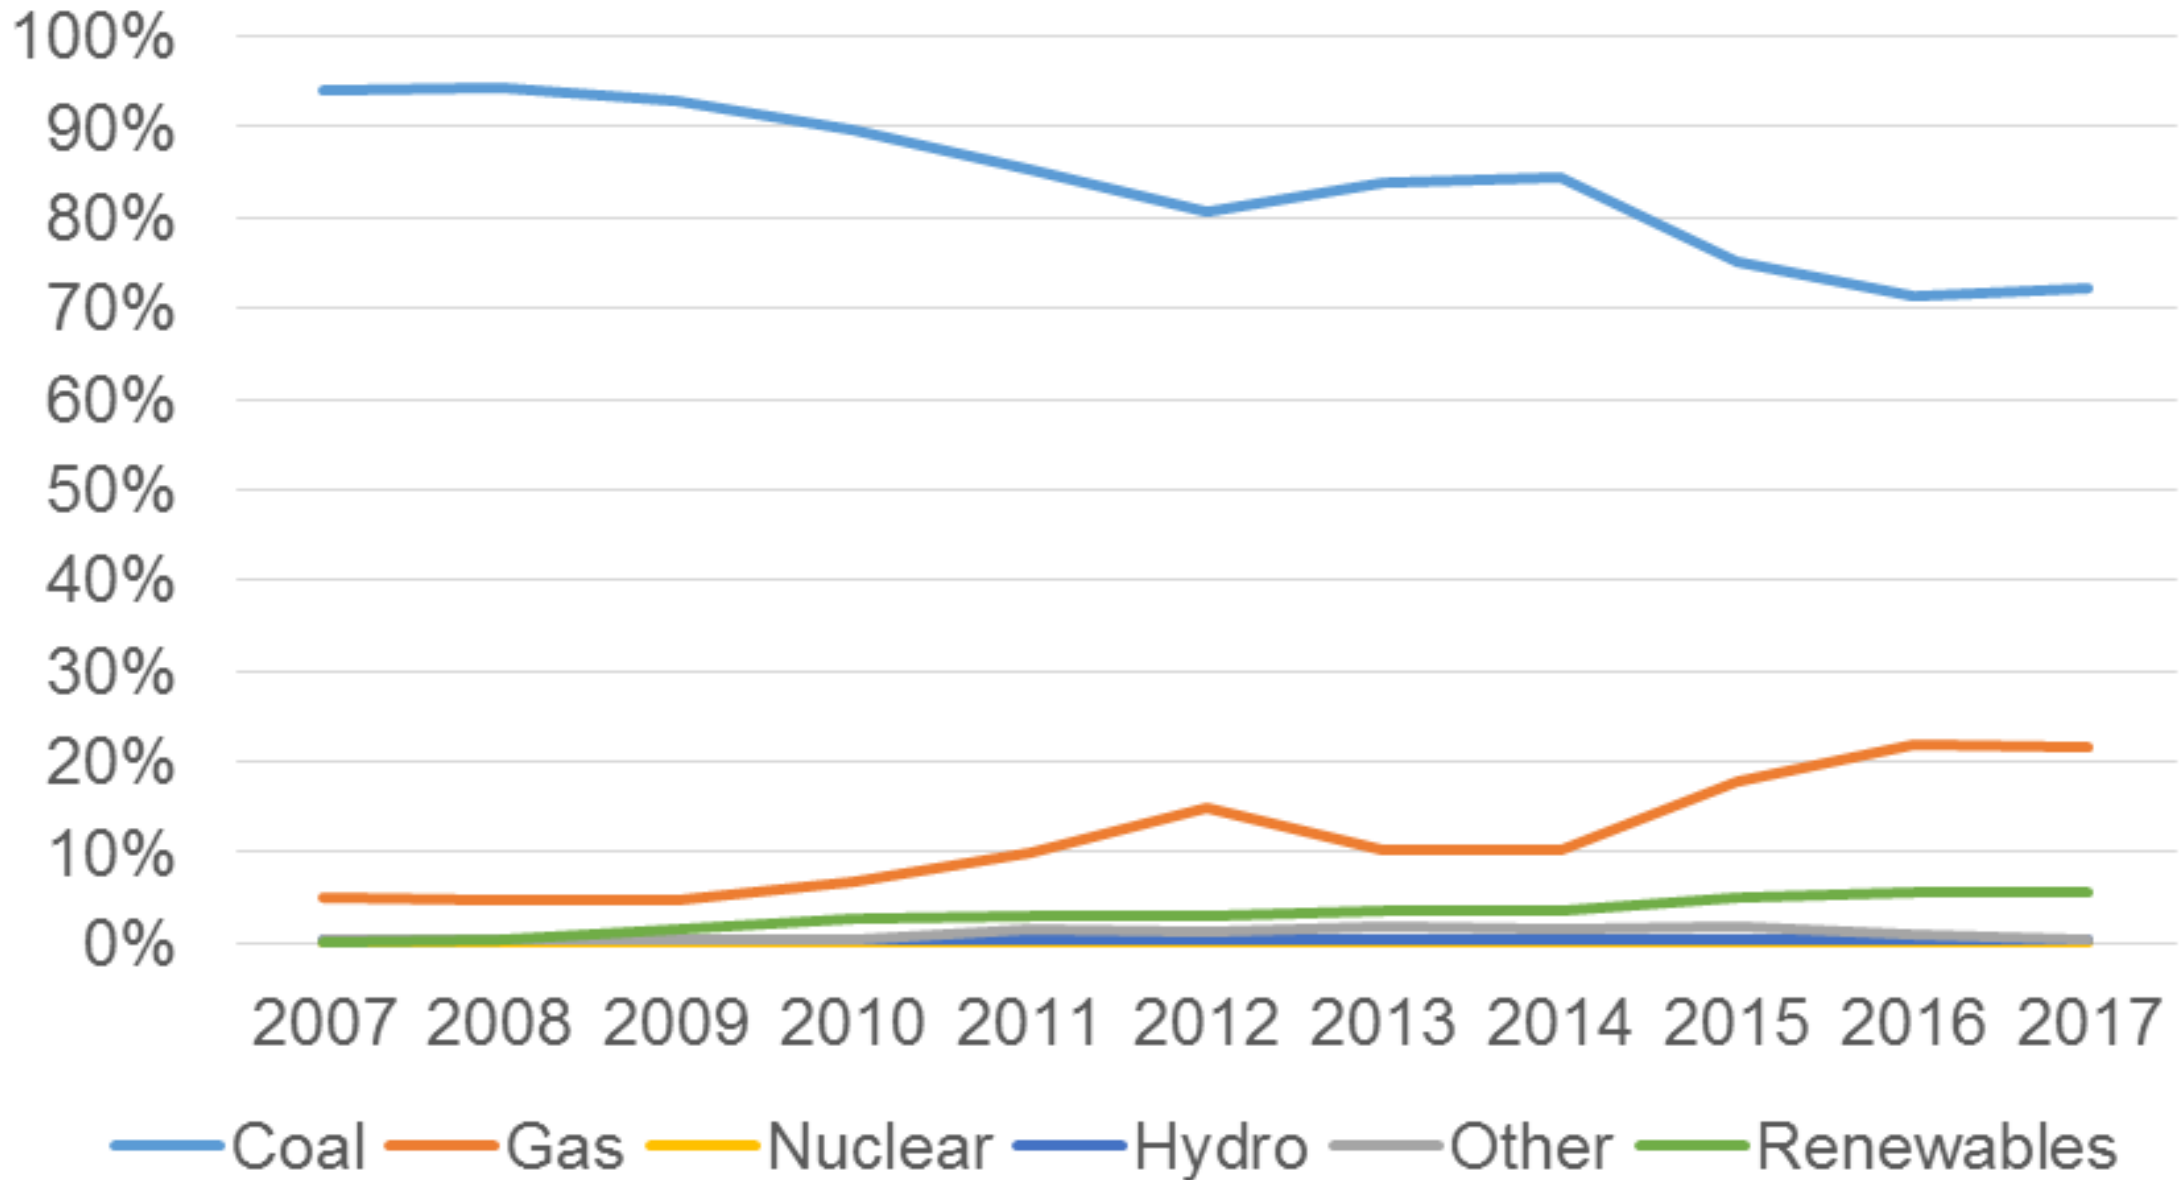

Remaining Coal Plants' 2015 CO2 Emissions

Indiana Electric Generation by Source (million MWh)

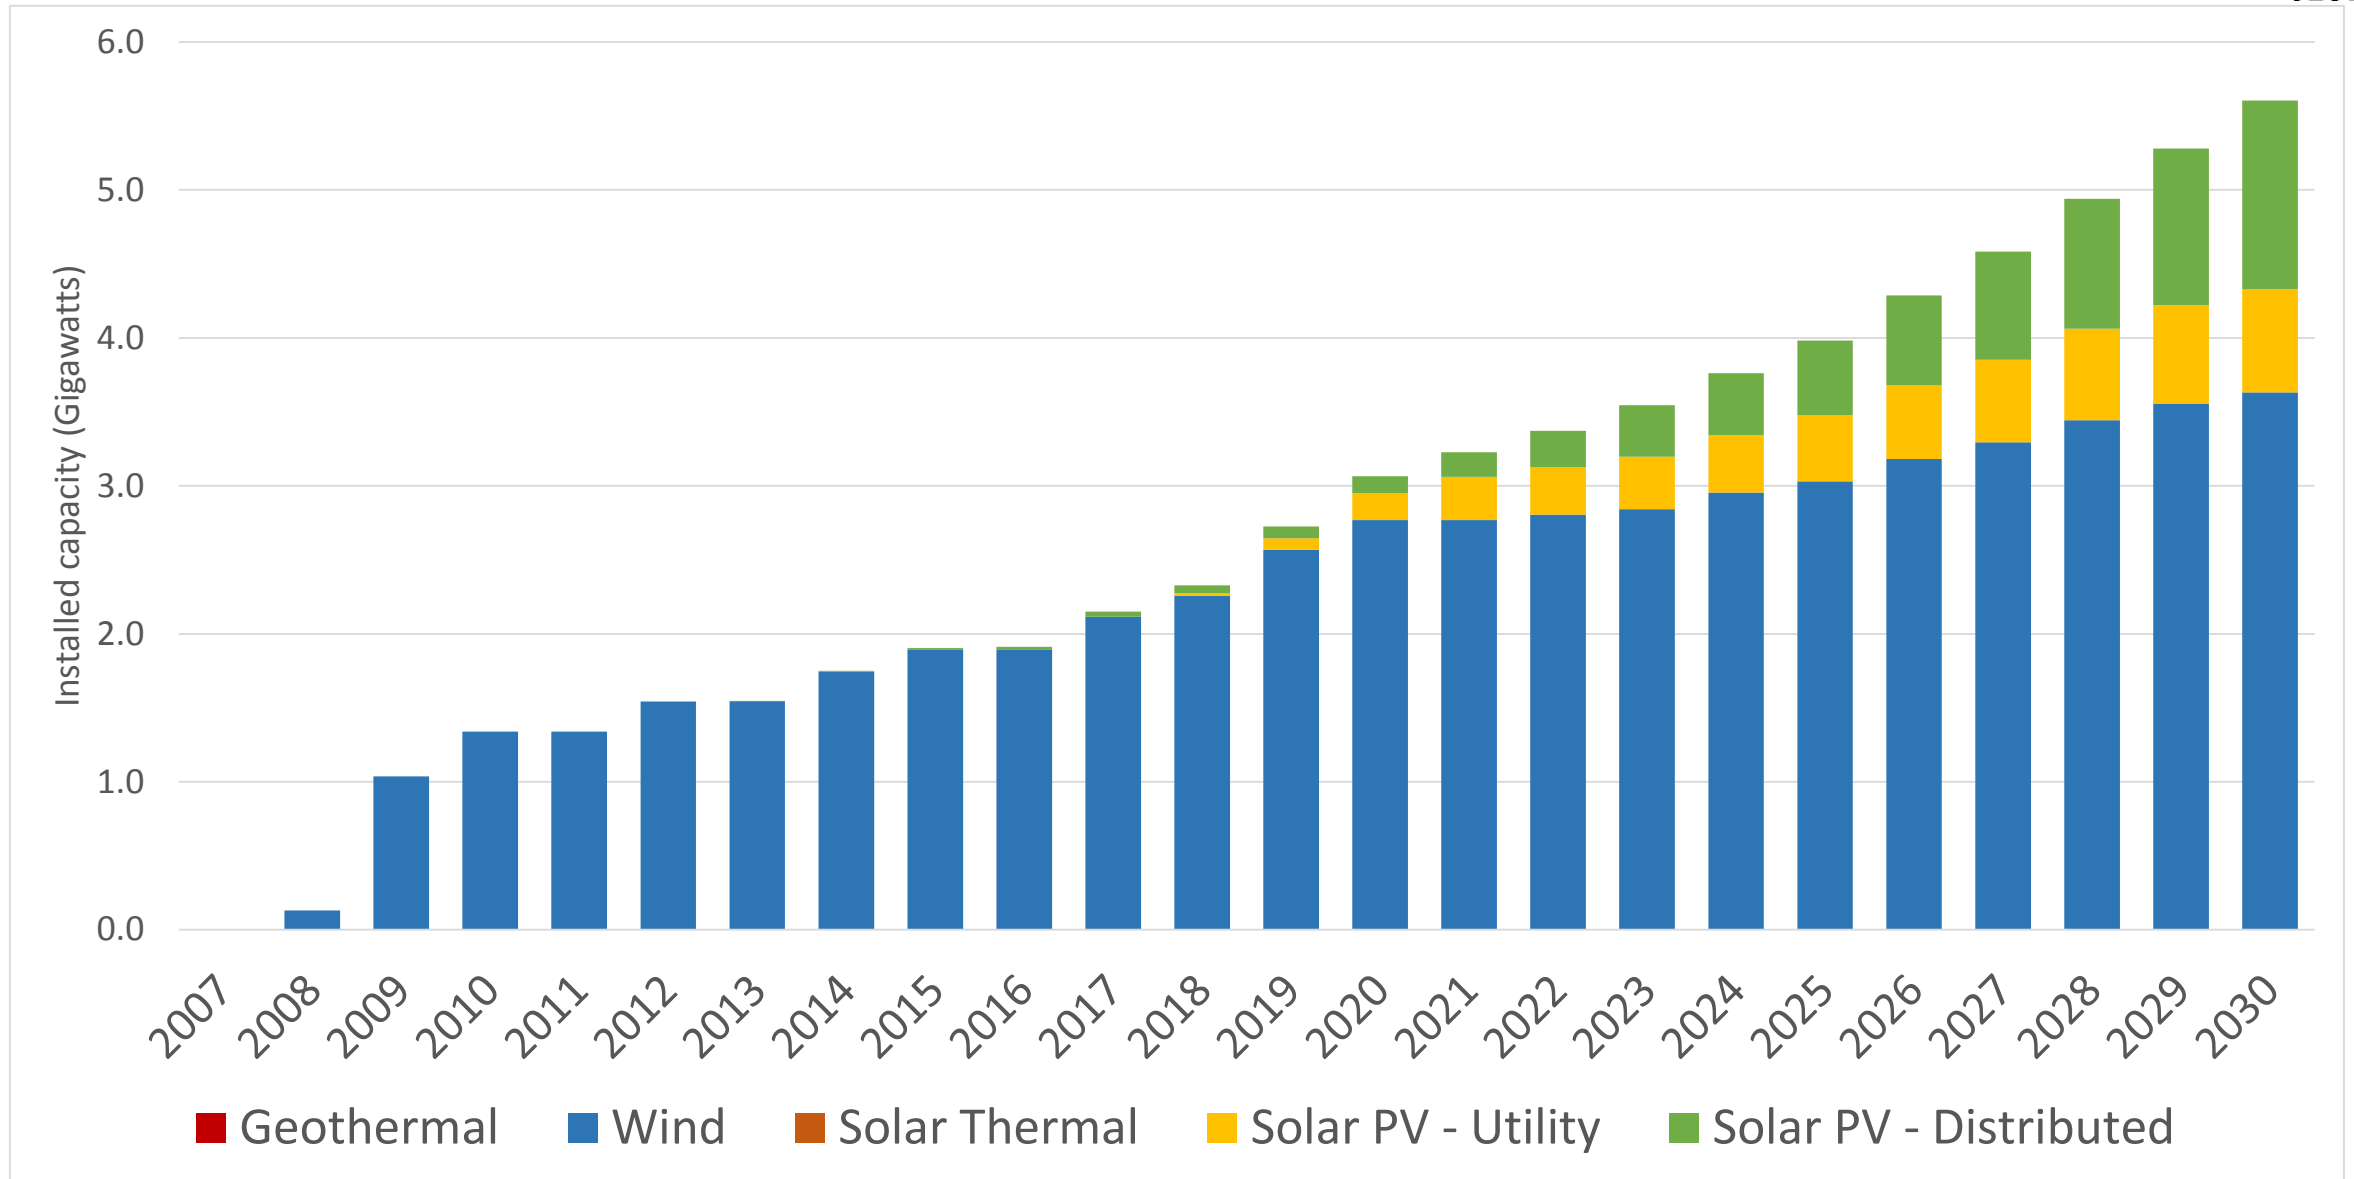

Indiana Electric Generation by Source (% of total)

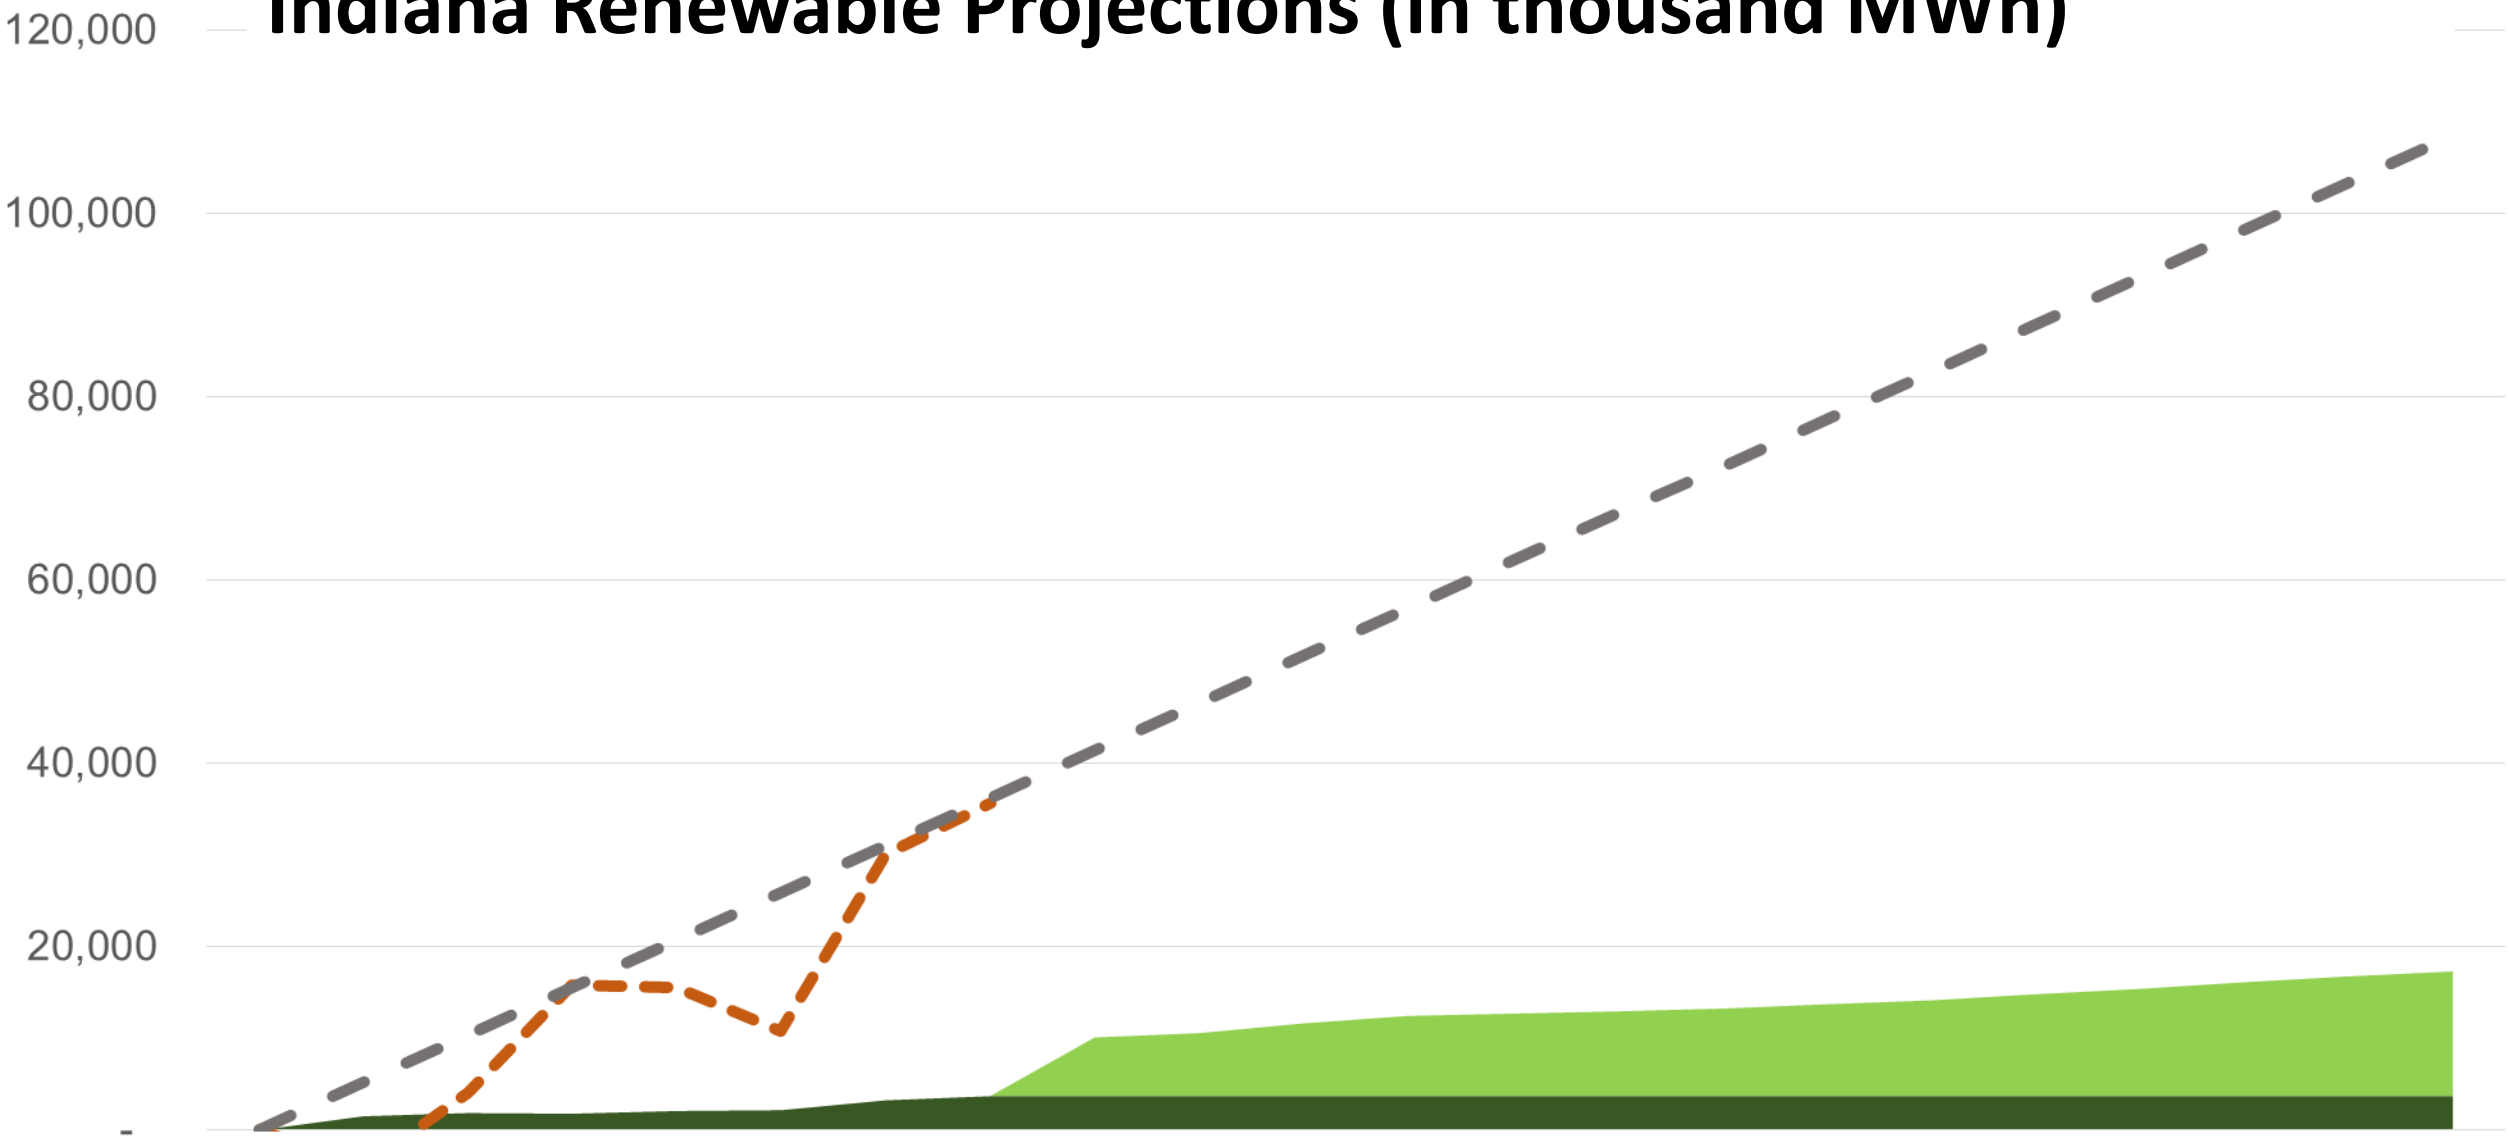

Renewable Energy Projections

Indiana Renewable Projections (installed capacity)

Indiana Renewable Projections (in thousand MWh)

- Wind and solar growth (2009-2016)
- Existing RPS
- Non-policy driven
- Existing EERS
- Coal decline (actual)
- Coal decline (all coal)
